Bugfixes

| INFORMATION | |
|---|---|
|  | <p>When opening a project with the new version (2017-18.10), projects of the directly previous version (2017-18.01)</p> <p>are converted and can no longer be opened with the previous version</p> <p><input checked="" type="checkbox"/> Single-User <input checked="" type="checkbox"/> Multi-User</p> <p>are not converted and can still be opened with the previous version</p> <p><input type="checkbox"/> Single-User <input type="checkbox"/> Multi-User</p> <p>COM Registration <input checked="" type="checkbox"/> the COM library has been changed and should be registered again (start the program as ADMIN using „E3.series.exe /register“)</p> |

The bug fixes are sorted and listed by designer number(s). This enables you, for example, to easily search for bugs reported to our support office.

- Designer-18428** COM method txt.CalculateBoxAt() always returns 0
- Designer-29331** When using a text key in a pin symbol description, the selection list doesn't show this text in the defined project language
- Designer-29961** No function of internal/external terminal plan assignment at plugged terminals
- Designer-30130** Incorrect display of device attribute values with copies within the connector table symbol on assigned text types
- Designer-30358** PDF export is showing circles on a model -> reason is very small arcs as a result of DXF import
- Designer-30426** No message appears when symbols are changing or the signal is changed (due to new signal equivalences) by component exchange
- Designer-30446** After update of component a user-specific signal is removed
- Designer-30480** COM: The COM method "dev.SetPanelLocation" places models at wrong position, if 3D mode is active
- Designer-30489** Update problems at Master-Slave-texts in Multiuser when symbols are displayed/hidden over options
- Designer-30531** At search for revision marks in the E3 internal graphical comparison, entries for the defined languages in the .ini-file are imported incorrectly
- Designer-30553** At import of a subcircuit the following error occurs 'E - Error in function houtline\outline_pointer_adr(), ret = 2' -> reason: incorrect subcircuit

| | |
|-----------------------|---|
| Designer-30583 | Attribute text template symbols are always assigned to the primary model |
| Designer-30589 | Symbols may be missing on the sheet after Ruplan import |
| Designer-30619 | When the task bar is left-justified, the tooltip doesn't work |
| Designer-30626 | Performance problems when working on large panel sheet |
| Designer-30637 | Incorrect assignment or no import of texts after RuplanImport |
| Designer-30639 | E3.CutOut: Drill holes are output as DXF function 'Polyline' and not as function 'Circle' (depending on the Acad version used) |
| Designer-30653 | COM: The COM method 'dim.Create' creates a free position although a position is set and snapping points are available |
| Designer-30659 | "Change already plugged mating connectors to the new active mating connector" doesn't work with blocks from the database |
| Designer-30662 | The value under "Extension line offset" at dimensions gets lost when the (MU) project is closed in multi-user mode |
| Designer-30689 | Performance problems with system cable containing numerous wires and shieldings |
| Designer-30700 | Error message upon opening older projects, when the database definition for the conversion program still exists in the registry |
| Designer-30703 | E3.Add-ons: Include Device Table: After sorting in Excel the item designations are incorrectly changed |
| Designer-30710 | Performance problems when opening a project (conversion) or after placing a symbol with text type "Reference from original to view" (#1092) |
| Designer-30724 | Renaming pin names in Database Editor takes very long |
| Designer-30733 | E3.ReportScripts: BOM: Additional column doesn't report data, when it's a component attribute |
| Designer-30737 | Performance problem when moving a component's symbols in Database Editor |
| Designer-30751 | "Connection type" in "Slots/Pins" dialog tab is not displayed in Database Editor |
| Designer-30753 | When the column width of 'device designation' in the connection table is minimized to 0, it can't be added to the table again |
| Designer-30764 | Manually changing the variants/options XML file may create nested variants in project |
| Designer-30774 | Error message 'Error 1 in chain\init_chain(), rc = 0' when updating all changed components in a specific project |
| Designer-30781 | Dimensions that are assigned to a symbol's graphic objects are deleted after updating the symbol |
| Designer-30782 | Different foreground / background definition after component update |
| Designer-30785 | Program may crash upon inserting a wire if wire names are created automatically but there is no rule defined in the settings |
| Designer-30786 | When exporting complete project to PDF, hidden 'external documents' are contained |
| Designer-30815 | Dynamic mountings can't be placed on a 2D panel view - Error "No slot found for device -xxx on 2D panel sheet" |
| Designer-30827 | Attributes on end1 or end2 of a cable type are not displayed anymore or can't be saved to the library |

- Designer-30836** When a project contains a block component with a DIN representation (DEFDES) which has a maximum length of 4 characters, the creation of a Multiuser project fails or such a block component can't be added to an existing Multiuser project
- Designer-30839** Reference between device views' (#1099) doesn't refer to the next higher number
- Designer-30851** "E - ATTVAL_ITEM/xxxxx (16-4-0-5544)::ownptr is invalid " messages when the project is opened in a new version
- Designer-30872** Import drawing' may rename user-defined signals in a signal class
