## Bugfixes

### INFORMATION

When opening a project with the new version (2017-18.36), projects of the directly previous version (2017-18.35)

are converted and can no longer be opened with the previous version

Single-User

Multi-User

**are not converted and can still be opened with the previous version**

**Single-User**

**Multi-User**

#### COM Registration

**the COM library has been changed and should be registered again**

(start the program as ADMIN using „E3.series.exe /register“)

The bug fixes are sorted and listed by designer number(s). This enables you, for example, to easily search for bugs reported to our support office.

- Designer-11031** Possible to place a dynamic symbol within a block
- Designer-30949** Connector pin terminal symbol is not displayed when placing a new device view with the setting "Use active connector pin terminal"
- Designer-31053** Incorrect display of drill hole in cutout
- Designer-31061** ¶ (Pilcrow) in output window with Russian operating system
- Designer-31269** Impossible to directly connect a feed-through connector with single pin display from within the Database window - 'Invalid position - Cannot place ALL the symbols; command aborted.'
- Designer-31431** The COM method "sym.PLacePins" doesn't work when an assembly is defined as connector pin terminal
- Designer-31533** Symbol graphic is changed after connecting MIL connectors by using variants
- Designer-31591** Using Multiple Selection of graphic elements enables display of arrowheads on full circles
- Designer-31682** Sheet access permission (for Delete Sheet) only works when the sheet has been opened before
- Designer-31732** When resetting the Database tree, folders and contents remain expanded
- Designer-31895** Double display of graphics by COM script exporting PDF from Formboard sheet
- Designer-31902** Write protection via read-only level does not work for graphic groups
- Designer-32043** When starting the DBE from E3.series, the maximum permitted

sheet number affects the number of opened objects and leads to following message at graphic copy "Maximum of x sheets exceeded!"

<b>Designer-32046</b>	Error 'E - Error in function hncpst\get_valid_composites(), ret = 1' when copying a block symbol whereas the block owns a 'component without structure' without taking the structure and the block connectors don't have a component description assigned
<b>Designer-32071</b>	Nodes can't be deleted in Formboard
<b>Designer-32086</b>	Selected connect lines on panel sheet are displayed differently
<b>Designer-32125</b>	Not all model instances are updated in project
<b>Designer-32138</b>	E3 may crash under certain circumstances, when the COM method "sht.ImportDXF" is called with empty file name
<b>Designer-32158</b>	The option "Copy from selected sheet" does not work for text types "Name 1" (#40) and "Name 2" (#48)
<b>Designer-32204</b>	Wrong representation with PDF export (and all other exports) at ballooning
<b>Designer-32210</b>	SVG file in combination with HCV export of E3.3DRoutingBridge is incomplete
<b>Designer-32236</b>	Change on pin attribute interrupts with following message "Locked device(s) xxxxxx has been changed. Your changes will be reverted."
<b>Designer-32241</b>	Opening / editing a component in Database Editor may cause an infinite loop under certain circumstances
<b>Designer-32244</b>	E3.ReportScripts: Add-ons - E3.series documents - Create BOM: Price is not listed, when article number of component differs from the component name
<b>Designer-32246</b>	No ability to insert negative Z-coordinates in DBE in the node coordinates from a model pin - message - 'I - The value must be between 0.00 and 1000000000000.00'
<b>Designer-32256</b>	E3 wrongly jumps to Pin Table when the pin is displayed in the column "Connection Target"
<b>Designer-32269</b>	The attribute '.Wiretype_Default' is not evaluated at signals of a signal class
<b>Designer-32286</b>	When a connector doesn't have a general connector symbol, it cannot be assigned to a block in DBE
<b>Designer-32287</b>	COM: The COM method "Pin.GetCableDuctIds" returns cable ducts twice
<b>Designer-32300</b>	Pin attributes in a formboard table subrow are not displayed
<b>Designer-32319</b>	Incorrect sorting of selection list for 'Connection type'
<b>Designer-32337</b>	GraphInterface::SetImageInfo can't embed TIF images
<b>Designer-32345</b>	Multi-user project cannot be opened due to text conflict after this text has been deleted in another Client (e.g. Update in Project, Change Component, Change Symbol)
<b>Designer-32351</b>	Incorrect length calculation for conductors/wires in cable duct references due to double elements having variants assigned
<b>Designer-32383</b>	When inserting multiple wire names and defining angle brackets (<n>) as format string, the wire names are no longer incremented
